

BHUVANESH THUMMALAPENTA

8179346447 | bhuvaneshthummalapenta@gmail.com | GitHub | LinkedIn | Telangana

Summary

Aspiring AI and software engineer with strong foundations in Python, SQL, data structures, and machine learning. Experienced in NLP, Generative AI, and full-stack development through academic and personal projects. Passionate about building intelligent systems and solving real-world problems using AI and analytics.

Skills

Programming Languages: Python, Java, C, JavaScript

AI / ML: Machine Learning, NLP, Large Language Models

Databases: MongoDB, MySQL

Web Development: HTML, CSS, React.js, Bootstrap, Node.js

Concepts: Data Structures & Algorithms, DBMS, OOP

Tools: Power BI, Git, VS Code

Education

Sreyas Institute of Engineering and Technology | Hyderabad

B.Tech in CSE (AI & ML) | 2027 | CGPA: 8.92

- Studied programming, data structures, DBMS, operating systems, and software engineering.
- Built academic projects using Python, Java, React, and SQL.
- Developed strong analytical and problem-solving skills.

Projects

LLM Hallucination Detection System

Python, NLP, Hybrid Retrieval

- Developed an AI-based hallucination detection system for Large Language Models using hybrid retrieval methods.
- Combined BM25 and dense embeddings to improve factual verification and retrieval accuracy.
- Applied NLP techniques for semantic analysis and hallucination detection.
- Improved response reliability by reducing hallucinated outputs.

Cricket Score Simulator

Java, OOP

- Developed a Cricket Score Simulator in Java to replicate real-time match scoring and player statistics.
- Implemented match logic, score tracking, and command-line interaction.
- Improved console-based visualization and user interaction.
- Applied object-oriented programming concepts for modular code structure.

ERP Management System

React, Node.JS

- Built an ERP system for employee, attendance, leave, and payroll management.
- Implemented secure role-based authentication for Admin and Employees.
- Developed CRUD modules and dashboard analytics for workflow efficiency.

Certifications & Achievements

- Runner-Up in Ideathon for developing the Cricket Score Simulator project.
- Oracle AI Foundations Certification.
- Achieved 3rd Place in a Codeathon programming competition.

Interests

- Solving logical puzzles and brain teasers
- Reading fiction and non-fiction books
- Exploring new programming tools and frameworks
